Brief Description of Arguments to be Presented:

Applicant will generally discuss the claims of the present application and the prior art of Walker and Shulman.

Specifically, Applicant will discuss that identifying a player in association with a player tracking card and further receiving an identifier associated with a tournament game card (which is provided in response to paying a fee) is significantly different than separating the components of an invention.

Applicant will further discuss that while the player tracking card of Walker stores player identifying information and a smart card of Walker stores player credit balance information, neither the player tracking card or the smart card of Walker, separately as two cards or in combination as a single card are associated with an identifier which determines a time duration a player may play in the time remaining in a tournament.

Shulman does not cure these deficiencies of Walker.

Applicant is open to discuss clarifying claim amendments during the interview.

An interview was conducted on the above-identified application on _____.

NOTE:

This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01). This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.
